

TAMAÑO

FRUIT SIZE PROMOTER
ORGANIC NITROGEN FERTILIZER
Mixture of organic nitrogen elements

COMPOSITION (%w/w)

Total nitrogen (N)	5%
Organic nitrogen (N)	5%
Organic biological carbon (C)	18%

TAMAÑO is a formulation that combines several organic elements that activate the cytokinesis phase on fruit tissues . This product improves fruit consistency and increase fruit size resulting in a more uniform harvest. This product also contains seaweed elements that are rich in alginates, amino acids, vitamins, betaine, gibberellines and cytokines which are all vital elements for the plant development.

Allowed in
**BIOLOGICAL
AGRICULTURE**
