AUTOMATIC WATER PUMP

REFERENCE AC1062

Automatic water pump, a very simple and economical way to dispense natural water at ambient temperature. This automatic pump can be used by both children and adults without any complications. It is perfect to have at home or in the office to dispense water comfortably. Its **compact size** makes it easy to transport and change from one bottle to another without any problems.

The automatic pump is activated by simply pressing the button on the top. Once the top button is pressed, the pump sucks the water from the bottle and serves it through the STAINLESS STEEL tap. To stop serving water, simply press the top button again. This same button is the one that activates and deactivates the water pump. It lasts for 75 minutes of uninterrupted operation and takes **only 7.8 seconds to fill a cup**. It has the capacity to serve 78 litres/hour.

Each Automatic Water Pump comes with a **Micro USB charging cable**. The battery capacity is 1200mA which is charged via the USB cable for 3-5 hours to achieve a full charge. Total battery life is between 800 and 1000 charges. At the top, on the activation button, is an LED light that indicates the battery charge status. This light stays red as long as it needs to be charged and turns off when the charge is complete.

It fits over the **5-gallon bottle cap** with the valve removed. The silicone tube measures 52cm and is inserted through the valve hole into the bottle. It is suitable for bottles from 11.8 to 20 litres as long as they are fitted with the 5-gallon cap.

Specifications

Height	14 cm
Width	8 cm
Weight	0,259 kg
Battery	1200 mA
Power	4 watts
Voltage	DC-5Vpe
Material water pump and cannula	ABS and silicone
Faucet material	304 stainless steel
Units per box	50 units
