SUPPORT + TAP

REFERENCE AC1032 + AC1019/AC1040/RE1174/AC1042

The **Support + Tap** kit is another way, also very economical, of having a very simple and efficient ambient water dispenser at home or in the office.

The support is made of iron with a chrome treatment that prevents corrosion and is compatible with any of our PET bottles in their different formats, 12 litres, 18.9 litres and even 20 litres. Or with the 48mm screw tap, for the most common supermarket bottles from 3 to 10 litres. The iron stand, painted black, offers sufficient height to dispense water comfortably into a glass. If it is placed close to the edge of the worktop or table, it can also be used to fill larger bottles.

The high flow tap is easy to install and fits our 5 gallon caps. There are three taps available, all in white. These taps work with 5 gallon cap bottles, the tap needs the stopper to fit. With 55mm necked bottles but without a stopper. Or with smaller bottles with 48mm neck.

The Support + Tap Kit is ideal for placing it always on the edge of a table or kitchen bench, so it allows you to fill glasses, bottles and carafes without any problem.

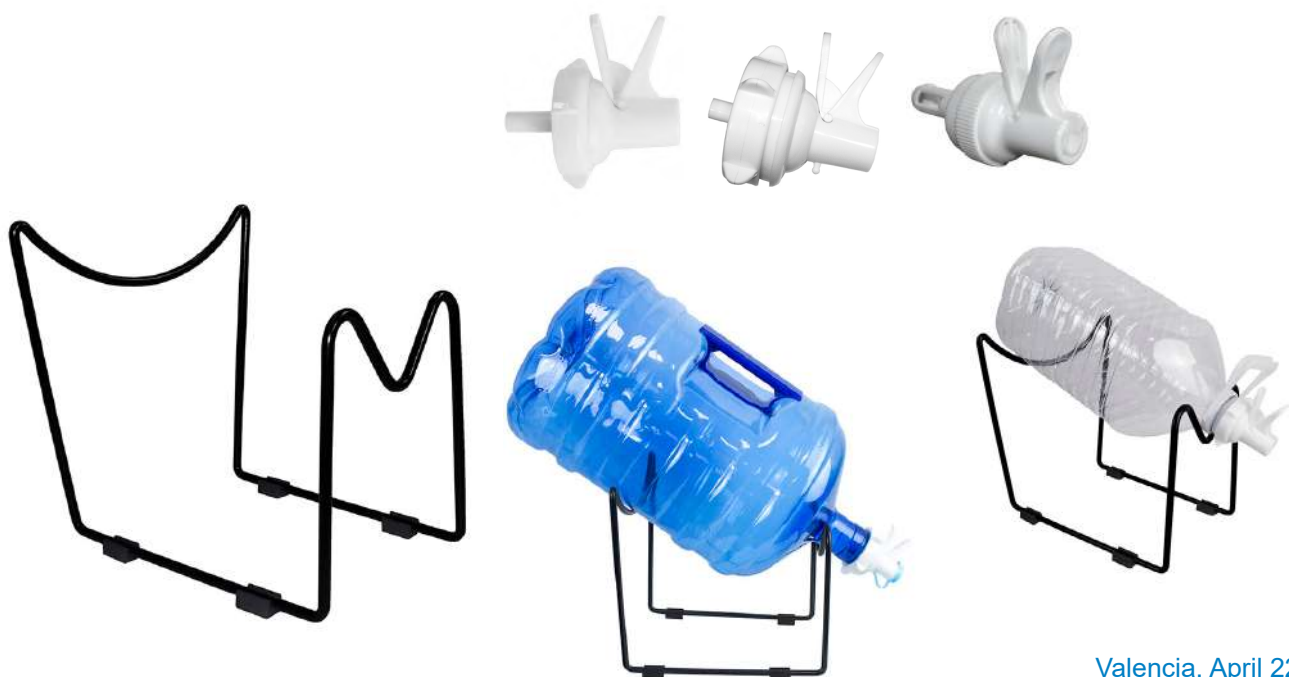

In addition, we increase its functionality when we complement it with our new 2-bottle PET Stacker. In this way, you can have two spare bottles and keep the aesthetics of the product simple.

- ✔ Desktop.
- ✔ Simplicity.
- ✔ Cheap.
- ✔ Room water.

Measurements: 20 cm to 26 cm (height) x 16 cm to 25.5 cm (width) x 27 cm (depth).
