FOOD SAFETY

This product neither contains nor comes from genetically modified organisms (GMOs) and there is no accidental contamination from GMOs. It has not been subject to any irradiation process.

The product description and processing prior to shipping have been in accordance with current food safety regulations.

USE

How to use the frozen product:

Defrosting is not necessary.

Remove from freezer, remove the required quantity and return to the freezer. Do not break the cold chain.

How to use the defrosted product and storage guidelines:

Thaw in refrigerated conditions for the necessary time. Once the product has been defrosted, restore in the sealed container at a temperature of 0-4°C for up to 7 days.

ENZYMATIC BROWNING OR CHANGES IN PRODUCT COLOUR

Garlic contains enzymes and organic substances susceptible to chemical variations that result in a change in their natural state. These changes are often accompanied by changes in colour. These processes are primarily oxidative and are caused by the product's contact with air or light and occur more rapidly when the product is cut or chopped, resulting in green and brown colours. However, the fact that the product is browning does not mean that its organoleptic, microbiological, and physical and chemical properties have been altered. It is still suitable for consumption.

STORAGE AND TRANSPORT CONDITIONS

Store frozen product between -18°C and -20°C. Best before 20 months.
