

DATA SHEET

WATER BOTTLE STACKER

REFERENCE AC1001

Our product, the **Water Bottle Stacker**, is the most economical and efficient option for storing water bottles.

Its usefulness is given by the storage of bottles in a stacked form, with a resistance of up to 40kg, as it is made of **Polypropylene (PP)** material of great strength, hardness and lightness. It is possible to store up to two of our bottles in different formats, from 11.8 to 20 liters.

It is an ideal way to take advantage of space in places where metallic shelves cannot be placed for four bottles, or even to complement Pocket and tabletop dispensers, in a way that keeps the design simple and reduced.

Available in Blue.

This product is perfect to combine with our water pump.

*See combinations on next page.

WATER BOTTLE STACKER

REFERENCE AC1001

Specifications

Total weight	405 gr
Depth	210 mm
Height	250 mm
Capacity	2 bottles
